

HOTSTAB REMOVAL TOOL

Technical Data / Specifications

Dimensions

Length	24 in
Width	10 in
Weight in Air	87 lbs
Wight in Water	83 lbs

Performance data

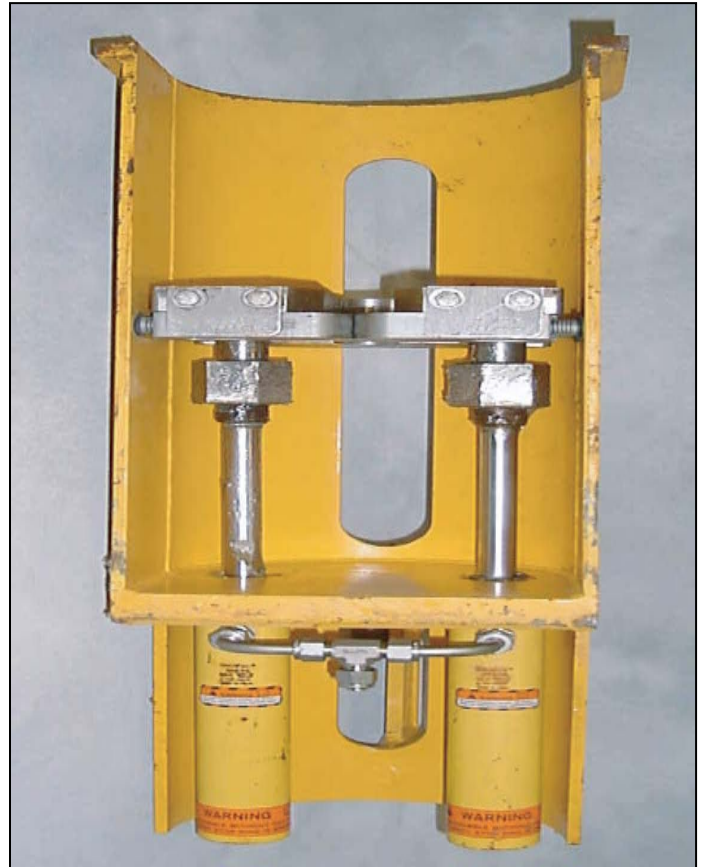

Depth Rating	5,999 ft
--------------	----------

Hydraulic Data Performance

Hydraulic Fluid	Envirorite 22
ROV Supply Pressure	3,000 psi
Maximum Operating Flow	7 gpm
Minimum Operating Flow	3 gpm

Construction Materials

Epoxy Coated Carbon Steel

Overview

The Hot Stab Removal tool is a hydraulic tool that is designed to release hot stabs that have become stuck in an interface panel. The tool is placed between the T-handle of the hot stab and the Interface panel. It is then hydraulically extended and pulls the hot stab out.
