

DRILLING DREDGE PUMP

Technical Data / Specifications

Height	12 in
Weight in air	31lbs
Weight in water	24lbs
Capacity	450 gpm
Length	14 in
Width	16 in
Hydraulic Supply Pressure	,000 psi
Hydraulic Supply Flow	to 9 gpm

Features

- Removes sand, mud, clay from around work structures
- Ideal for light cleaning tasks
- dredges solids up to 3 in in size

Overview

The Dredge Pump is an ROV mounted tool predominantly used for the cleaning and removal of drill cuttings from drilling templates and guide bases.

The Stanley Dredge/Jetting (Trash) Pump is used for small dredging and light cleaning Getting) tasks. It can move large quantities of liquids at low pressure and can handle 25% by volume concentrations of solids up to 3 in in size.
